This document describes the functional behaviour of the **Raw Material Consumption Report** module. It outlines how users can configure reports using filters and KPIs, save their configurations as variants, and generate detailed visual and tabular outputs. The system supports flexible workflows depending on whether the report is being generated from scratch, from a user's own saved variant, or from a public variant shared by another user.

1. Overview

The Material Consumption Report is designed to help users track and analyze the usage of raw materials across furnaces. Users can apply filters, select KPIs, and visualize key metrics. The interface supports saving report setups as **variants**, sharing them with others, exporting data, and printing insights.

The Raw Material Consumption Report module consists of:

- **Report Configuration Interface** – where filters and KPIs are selected.
- **Report Output View** – where the results are displayed and further actions can be taken.

2. Report Configuration Interface (Setup View)

When entering the configuration interface, users can optionally choose from previously saved report setups known as **variants**. These variants can either be **created by the user**, or **public variants shared by others**.

2.1 Variant Name Selection

- A dropdown labelled “**Variant Name**” is provided at the top.

- User selects the Variant ID from a single select dropdown
- Mandatory - No
- Default value - No
- Field Type - Single Select Dropdown Values: All Variants saved (Public and Private). **Dropdown Structure:**
 - **My Variants**
 - Private
 - Public (shared icon)
 - **Public Variants** (created by others)
- Validation - No
- **Permissions:**
 - Only the creator can edit, delete, or update their variant.
 - Other users can view or clone public variants.
- If no variant is selected, configuration starts blank.
- On selecting a variant, filters and KPIs are auto-populated.
- Only the creator of a variant can edit or delete it.

2.2 Report Filters (Mandatory fields marked with *)

Filter	Type	Description
Furnace ID*	Multi-select dropdown	Lists all furnaces assigned to user or organization.
Material Type*	Multi-select dropdown	Options: Quartz, Coal, Charcoal, Wood, Coke.
Material ID*	Multi-select dropdown	Dependent on Material Type. Lists valid material IDs.
Date Range*	Calendar picker	From and To date selectors.
Granularity*	Single-select dropdown	Options: Daily, Weekly, Monthly, Quarterly. No dependency between Date Range and Granularity field.

Supplier ID	Multi-select dropdown	Suppliers associated with selected Material ID.
-------------	-----------------------	---

Filter Behaviour:

- Filters cascade based on prior selections (e.g., Material Type → Material ID).
- Default values are empty; required fields must be selected to proceed.
- All Filter drop downs should be sorted alphabetically / numerically
- Filters are editable unless restricted via variant behaviour

2.3 KPI Selection

- KPI checkboxes/toggles are listed for selection.
- Backend provides the available KPIs per report.
- KPIs are not mandatory and report can be generated without selecting any.
- KPI Permissions Logic
 - **Selectable KPIs:** A user can only **select** KPIs for which their role has explicit **permission**.
 - **Visible but Disabled:** KPIs outside the user's permission scope will still be **visible** in the interface but will appear **disabled with a tooltip** (e.g., greyed out) and **cannot be selected**
 - Tooltip: "You do not have access to this KPI"
 - If a previously selected KPI (from a variant) is now unauthorized:
 - It remains selected but is **greyed out and locked with a tooltip**
 - Tooltip: "You do not have access to this KPI"

The screenshot shows the 'Material Consumption Report' interface. On the left is a sidebar with icons for variants, filters, reports, and other functions. The main area has a header 'Material Consumption Report' with a refresh icon. Below it is a 'Variant Name' dropdown set to 'Variant 1'. The 'Filters' section contains five dropdowns: 'Furnace ID*' (1), 'Material Type*' (Quartz), 'Material ID*' (Mina Sonia 30/I20), 'Date Range*' (15/10/2024 - 16/9/2024), and 'Granularity*' (Week). Under 'Supplier ID', there is a dropdown with the value '1'. In the 'KPIs' section, three toggle buttons are shown: 'Material Consumption (ton)' (selected), 'Material Variance (USD)', and 'Material Variance (Qty)'. A tooltip box is overlaid on the 'Material Variance (Qty)' button with the text 'You do not have access to this KPI'. At the bottom right is a 'Generate' button.

- **Max 3 KPIs can be selected.**
 - If a user selects more than 3, an inline validation appears: “*You can select up to 3 KPIs only.*”
- Each KPI has a **default chart type** (bar, line, pie, etc.) configured by backend.
- In the **generated report screen**, users can change the chart type per KPI using a dropdown.

2.4 Action Buttons

Button	Function
Generate Report	Validates inputs and transitions to Report Output View.
Reset	Clears all filters and KPI selections to default state.

The screenshot shows the 'Material Consumption Report' interface. On the left is a vertical sidebar with icons for navigation. The main area has a header 'Material Consumption Report'. Below the header are sections for 'Variant Name' (with a dropdown menu), 'Filters' (including 'Furnace ID*', 'Material Type*', 'Material ID*', 'Date Range*', and 'Granularity*'), 'Supplier ID' (dropdown), and 'KPIs' (radio buttons for 'Material Consumption (ton)', 'Material Variance (\$)', and 'Material Variance (Qty)'). A 'Generate' button is at the bottom right.

3. Report Output View

Upon clicking **Generate Report**, the system transitions to a new screen with the following sections:

3.1. Header Section

- Format: Material Consumption Report : <Variant Name>
- **Untitled** if no variant is selected

- Variant Name (default: *Untitled* until saved)
 - Min - 1 and Max - 30 characters, alphanumeric, Only '-' and '_' is allowed, Single space is allowed in between the words, No leading spaces allowed.
 - **Edit Icon (✎):**
 - **Visible** only if the variant belongs to the current user
 - **Hidden** for public variants not owned by the user
 - Enables inline editing of Variant Name and Access Modifier (Private/Public).
 - A **Save** button confirms updates.

3.2. Filters Summary Section

- Displays all selected filters and metadata

Fields include:

1. Furnace ID - view only
2. Date Range (From - To) - view only
3. Granularity - view only
4. Supplier ID - view only
5. **Executed On** – *Displayed only in print view; not saved in variant.* view only
6. **Executed By** – *Displayed only in print view; not saved in variant.* view only
7. Material Type - view only
8. Material ID – Concatenated – Material ID_Material Name - view only

The screenshot shows a dashboard titled "Material Consumption Report : Untitled".

Filters:

Furnace ID 11	Date Range 15/10/2024 - 16/9/2024	Granularity Week	Supplier ID Supplier 1	Executed by sbadal Sahana Badal	Executed on 15/10/2024 3:15 pm
Material Type Quartz	Material ID Mina Sonia 30/120				

KPIs:

- Material Consumption (ton): 89 %
- Material Variance (USD): 89 %

Report:

Date	Material Type	Material ID	Furnace ID	Supplier ID	Total Consumption (Ton)
1/1/2025	Coal	MB01_Serrabal	1	Mine 1	133
1/1/2025	Charcoal	MB01_Serrabal	1	Mine 1	3.5
1/1/2025	Quartz	MCO2_Serrabal	2	Mine 2	1000

3.2 KPI Visualization Section

- KPIs selected are shown in graphical format.

Features:

- KPIs can be **removed** via a close (x) button on hover.
- KPIs can be **reordered** via drag-and-drop.
- KPI metadata and units are displayed.
- Users can **change the chart type per KPI** via dropdown. Chart types are dynamic based on the KPI.
- **If the user does not have permission to view a particular KPI at the time of generating the report, a placeholder will be shown in its place with a tooltip indicating lack of access. The KPI's details (value, chart, and metadata) will not be visible.**
- Focus
 - On clicking the three-dots menu of a chart, a menu opens with “Focus” as one of the options.
 - When Focus is selected, the chosen chart opens in a zoomed-in mode for better visibility and analysis of data.
 - Supported chart types (Focus enabled): Line, Pie, and Bar charts.
 - Unsupported chart types (Focus disabled): Card, Gauge, and cases where no data is available.
-

The screenshot shows a dashboard titled "Material Consumption Report : Variant 1". The top navigation bar includes a profile icon for "Nora James" and icons for print, download, and delete. The left sidebar has a dark theme with various icons for navigation. The main content area is divided into sections: "Filters" and "KPIs".

Filters:

Furnace ID 11	Date Range 15/10/2024 - 16/9/2024	Granularity Week	Supplier ID Supplier 1	Executed by sbadal Sahana Badal	Executed on 15/10/2024 3:15 pm
Material Type Quartz	Material ID Mina Sonia 30/120				

KPIs:

A gauge chart titled "Material Consumption (ton)" shows 89 % completion. To the right, there is a placeholder card with a circular icon and the message "You do not permission to view this KPI".

Report:

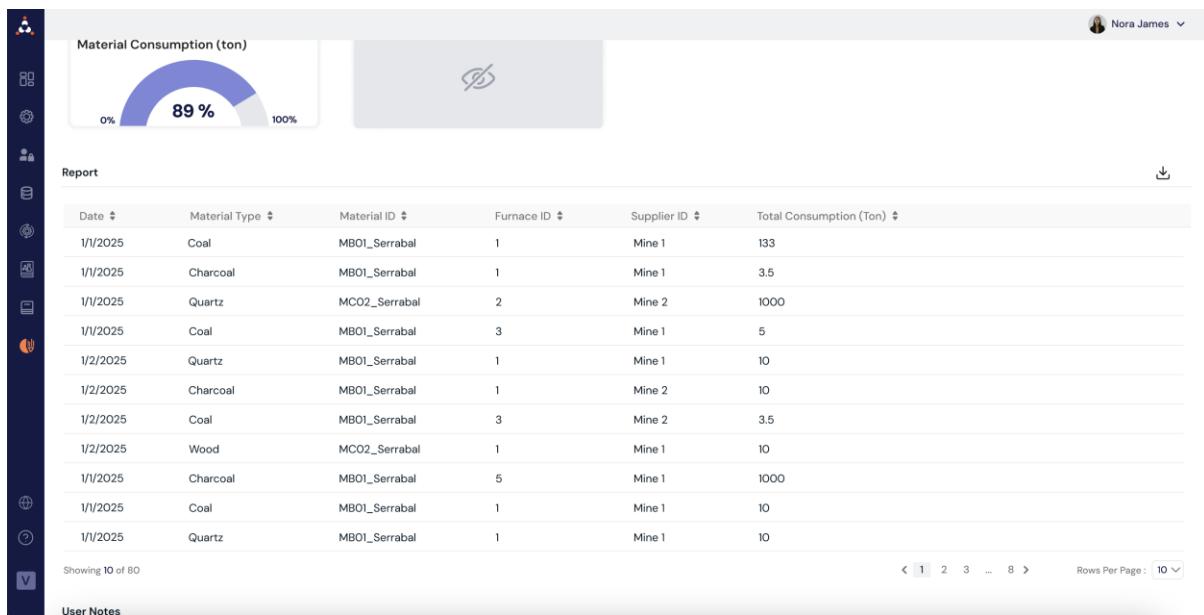

Date	Material Type	Material ID	Furnace ID	Supplier ID	Total Consumption (Ton)
1/1/2025	Coal	MBO1_Serrabal	1	Mine 1	133
1/1/2025	Charcoal	MBO1_Serrabal	1	Mine 1	3.5
1/1/2025	Quartz	MCO2_Serrabal	2	Mine 2	1000

3.3 Report Data (Tabular Format)

- Data displayed based on filters and granularity.
- It will have the following columns
 - Date
 - Material Type
 - Material ID
 - Furnace ID
 - Supplier ID
 - Total Consumption (Ton)

Table Features:

- Configurable columns via “Add Columns” menu
- Sorting and rearranging columns via drag-and-drop
- Pagination for large datasets
- Export to Excel (XLSX) “RawMaterialConsumptionReport_DD-MM-YYYY” using download icon

3.4 Notes Section

- Free-text input area for user insights. All (Including special characters), 100 characters
- Not saved with variant — intended for print inclusion only.

The screenshot shows a report interface with a dark sidebar on the left containing various icons. The main area is titled 'Report' and displays a table of data. The table has columns: Date, Material Type, Material ID, Furnace ID, Supplier ID, and Total Consumption (Ton). The data shows consumption over time across different materials and suppliers. At the bottom of the table, it says 'Showing 10 of 80'. To the right of the table are navigation links (1-8) and a 'Rows Per Page' dropdown set to 10. Below the table is a 'User Notes' section with a text input field labeled 'Enter your notes'.

Date	Material Type	Material ID	Furnace ID	Supplier ID	Total Consumption (Ton)
1/1/2025	Coal	MBO1_Serrabal	1	Mine 1	133
1/1/2025	Charcoal	MBO1_Serrabal	1	Mine 1	3.5
1/1/2025	Quartz	MCO2_Serrabal	2	Mine 2	1000
1/1/2025	Coal	MBO1_Serrabal	3	Mine 1	5
1/2/2025	Quartz	MBO1_Serrabal	1	Mine 1	10
1/2/2025	Charcoal	MBO1_Serrabal	1	Mine 2	10
1/2/2025	Coal	MBO1_Serrabal	3	Mine 2	3.5
1/2/2025	Wood	MCO2_Serrabal	1	Mine 1	10
1/1/2025	Charcoal	MBO1_Serrabal	5	Mine 1	1000
1/1/2025	Coal	MBO1_Serrabal	1	Mine 1	10
1/1/2025	Quartz	MBO1_Serrabal	1	Mine 1	10

3.5 Navigation – Back to Configuration

- A **Back** button appears in the report view.
- Clicking it returns the user to the **Setup View**, retaining all previous filter and KPI selections.
- Ensures seamless editing without re-entering data.

4. User Flows and Report Actions

Flow 1: No Variant Selected

- User starts with no variant; variant name field remains empty.
- Filters and KPIs are manually selected.
- Report is generated from scratch.
- Output view shows report as “**Untitled**”.
- The following report actions are enabled
 - **Print**
 - Exports the entire report as PDF.
 - **Save**
 - Saves current report configuration, including all filters and KPI settings
 - Required fields:
 - Report Variant Name
 - Access Modifier (Private/Public)
 - Only the creator can edit or delete saved variants.
- **Save As** and **Delete** are disabled.

- KPIs can be
 - Reordered
 - Removed
 - Change chart type
 - Focus
 - On clicking the three-dots menu of a chart, a menu opens with “Focus” as one of the options.
 - When Focus is selected, the chosen chart opens in a zoomed-in mode for better visibility and analysis of data.
 - Supported chart types (Focus enabled): Line, Pie, and Bar charts.
 - Unsupported chart types (Focus disabled): Card, Gauge, and cases where no data is available.

1/1/2025	Quartz	MCO2_Serrabal	2	Mine 2	1000

Flow 2: User Selects Own Variant

- User selects a self-created variant.
- Filters and KPIs are auto-filled and **fully editable**.

The screenshot shows the Material Consumption Report interface with a self-created variant selected. The variant name is "Quartz". The report displays various filters, KPIs, and a detailed report table.

Variant Name: Select Variant Name

- Variant 1
- Variant 2
- Variant 3
- Variant 4

Filters:

- Material Type*
- Material ID*
- Date Range*
- Granularity*

KPIs:

- Material Consumption (ton)
- Material Variance (\$)
- Material Variance (Qty)

Generate

- Output view shows the variant name with an **edit icon**.
- The following report actions are enabled
 - Print**
 - Exports the entire report as PDF.
 - Save** – Updates the changes made to the Variant.

The screenshot shows the Material Consumption Report Variant 1 page. At the top right, there is a green success message: "Report saved successfully!". The left sidebar contains various icons for navigation. The main area has sections for "Filters", "KPIs", and "Report". In the "Filters" section, Furnace ID is set to 11, Date Range is 15/10/2024 - 16/9/2024, Granularity is Week, Supplier ID is Supplier 1, Executed by is sbadal | Sahana Badal, and Executed on is 15/10/2024 | 3:15 pm. The "Material Type" is Quartz and the "Material ID" is Mina Sonia 30/120. The "KPIs" section displays two gauge charts: "Material Consumption (ton)" at 89% and "Material Variance (USD)" at 89%. The "Report" section shows a table of consumption data:

Date	Material Type	Material ID	Furnace ID	Supplier ID	Total Consumption (Ton)
1/I/2025	Coal	MBO1_Serrabal	1	Mine 1	133
1/I/2025	Charcoal	MBO1_Serrabal	1	Mine 1	3.5
1/I/2025	Quartz	MCO2_Serrabal	2	Mine 2	1000

○ Save As

- Saves current report configuration as a new Variant.
- Required fields:
 - Report Variant Name
 - Access Modifier (Private/Public)
- Only the creator can edit or delete saved variants.

The screenshot shows the Material Consumption Report Variant 1 page with a "Save Report Variant" dialog box overlaid. The dialog box has an input field "Enter Variant Name", a "Public" checkbox, and a red "X" and green checkmark button. The background shows the same filters, KPIs, and report table as the previous screenshot.

○ Delete

- Available for user-created variants.
- Delete via dropdown or trash icon with confirmation prompt.
 - “Are you sure you want to delete this variant “Variant Name”?

The screenshot shows a dashboard titled "Material Consumption Report : Variant 1". On the left is a vertical sidebar with icons for navigation. At the top right, there's a user profile for "Nora James" and a green success message: "Report saved successfully!".

Filters:

- Furnace ID: 11
- Date Range: 15/10/2024 - 16/9/2024
- Granularity: Week
- Supplier ID: Supplier 1

Flow 3: User Selects Public Variant Shared by Another User

- Public variant is selected.
 - Filters and KPIs are auto-filled and **locked** (read-only).

The screenshot shows a user interface for a 'Material Consumption Report'. On the left, there is a vertical sidebar with various icons. The main area has a title 'Material Consumption Report' with a refresh icon. Below it is a 'Variant Name' input field with a dropdown placeholder 'Select Variant Name'. A search bar with the text 'Q Va' is positioned next to it. A dropdown menu titled 'My Variants' lists 'Variant 1', 'Variant 2' (with a delete icon), 'Public Variants', 'Variant 1' (selected and highlighted with a blue border), 'Variant 4', and 'Variant 3'. To the right of the variant section are four filter fields: 'Material Type*', 'Material ID*', 'Date Range*', and 'Granularity*'. Each field has a dropdown placeholder and a calendar icon. At the bottom, there are three radio buttons labeled 'Material Consumption (ton)', 'Material Variance (\$)', and 'Material Variance (Qty)'. A 'Generate' button is located in the bottom right corner.

The screenshot shows the 'Material Consumption Report' interface. At the top, there's a header with a user profile for 'Nora James'. Below the header, a 'Variant Name' dropdown is set to 'Variant 1'. A 'Filters' section contains fields for 'Furnace ID' (11), 'Material Type' (Quartz), 'Material ID' (Mina Sonia 30/120), 'Date Range' (15/10/2024 - 16/9/2024), 'Granularity' (Week), and 'Supplier ID' (1). Under 'KPIs', three options are listed: 'Material Consumption (ton)' (selected), 'Material Variance (USD)', and 'Material Variance (Qty)'. On the right side, there's a 'Generate' button.

- Output view shows the variant name **without edit icon**.
- The following report actions are enabled
 - **Print**
 - Exports the entire report as PDF.
 - **Save As**
 - Saves current report configuration as a new Variant.
 - Required fields:
 - Report Variant Name
 - Access Modifier (Private/Public)

The screenshot shows the 'Material Consumption Report : Variant 1' page. It displays the same filter settings as the first screenshot. A 'Save Report Variant' dialog box is open in the center, prompting for a 'Variant Name' (with a placeholder 'Enter Variant Name') and an 'Access' option ('Public' is selected). In the background, the report results table is visible, showing consumption data for different materials across three furnaces.

Date	Material Type	Material ID	Furnace ID	Supplier ID	Total Consumption (Ton)
1/1/2025	Coal	MBO1_Serrabal	1	Mine 1	133
1/1/2025	Charcoal	MBO1_Serrabal	1	Mine 1	3.5
1/1/2025	Quartz	MCO2_Serrabal	2	Mine 2	1000

- **Save and Delete** are disabled
